

LOGSTOR's delivery concept 2018

High delivery performance and flexibility

Based on experience with the delivery concept 2017 from last season and response from our customers, LOGSTOR has revised the delivery concept here at the beginning of the 2018 season as follows

Delivery times

Product groups	Maximum working days EXW
Small and medium dimensions (DN 25 – DN 300)	10
Large dimensions (DN 350, DN400 and DN 500)	15 For the first delivery, a delivery plan for the project to be agreed
Valves	As agreed
Flex: 100 m coils	5
Flex: Fixed lengths & accessories	2
Other products	As agreed

LOGSTOR has a large number of pre-insulated products, components, joints and accessories on stock that are ready for dispatch with '1 days' notice

defining network efficiency

The objective of the delivery concept is to dispatch orders for products from a stated category within the number of work days, appearing from the table maximum. In many cases, we will actually be able to dispatch orders sooner.

To secure the high delivery performance and flexibility we have optimized the product mix and level of our stocks, based on past sales and future forecasts. Contact our Customer Service for details on delivery time for specific projects and in case of urgent deliveries on products available from stock.

For the large dimensions, it is important in good time to have information about expected delivery plan so that we can secure the availability of the raw materials.

All deliveries take place in accordance with LOGSTOR's General Sales and Supply Conditions. The availability of the products, i.e. the actual time of delivery may vary dependent on the actual demand. In some cases, the stated maximum delivery times may therefore be longer than stated in the table.

ABOUT LOGSTOR

LOGSTOR is a global supplier of complete pre-insulated pipe systems with a focus on providing a better energy efficiency to our customers every day. The invention of the technology behind the pre-insulated pipe systems has made LOGSTOR a leading global supplier and manufacturer of pipe systems for the energy industry.
