

LOGSTOR presents Marcin Klos - Foreman, Logistic

Please tell us a few words on how long have you worked for LOGSTOR and describe your position

I have been working at LOGSTOR since 2009, so my 10th year is running now. I started work as a warehouseman, and after some time I was promoted to the position of a foreman, which is my current job.

What do you value most at LOGSTOR?

I value the most the very good atmosphere in the company, opportunities for development and job security. One cannot disregard good salary here, as well as very attractive fringe benefits.

What have you learned here?

Going through various departments and positions at LOGSTOR I learned a lot starting from the basics of warehouse management through my first steps in the SAP system and finally the management of the team and work time.

What is LOGSTOR doing to make you successful at work?

LOGSTOR enables me to achieve success by continually investing in myself. Despite the fact that I am an individual, I feel I am a very important link in the whole group. Also, the autonomy of decision-making is very important here. All this leads to confidence, which translates into achieving success.

What is the most meaningful part of your work?

A very important aspect of my work is maintaining proper relations in the team I manage. I know that the good results of the department where I work depend on the employees. Another important aspect is the lack of routine — we face many challenges every day which only motivate us to take the necessary actions.

When do you have most fun at work?

Almost in every job and at every post there are stressful situations requiring quick reaction or quick decision making. If we succeed as a team to get out of such a situation, it is an enjoyable, exhilarating experience not only for me but for all employees involved in this task. We certainly have a great time during trainings or other meetings with the employees of the entire LOGSTOR group. You can then exchange experiences and share funny moments at LOGSTOR.
