Health, Safety, Environmental and Quality Policy

LOGSTOR is a global manufacturer of complete pre-insulated systems. Our systems ensure the most energy-efficient transport of liquids and gases for district heating, cooling, as well as oil and gas industries. The Health and Safety of our employees, protection of the Environment and Quality of our products and services are of paramount importance to LOGSTOR, as a company. This means that:

HEALTH & SAFETY	<ul style="list-style-type: none"> • Every employee involved in any LOGSTOR operations has a responsibility to actively contribute to an incident and injury free environment, with no harm to people and the external environment. • LOGSTOR ensures compliance with applicable local legislations and requirements, as well as external certification standards related to our industry. • LOGSTOR actively and permanently act to eliminate hazards and reduce OH&S risks, by substitute with less hazardous processes, operations, materials and equipment, day by day controls, trainings and use of adequate PPE. • LOGSTOR provides education, training and information to our employees, which enable them to protect themselves, their colleagues, contractors, visitors, and the environment. • LOGSTOR works with a no-blame culture where everyone is expected and encouraged to openly bring up issues or raise concerns about safety in the workplace, in order to achieve our vision of an incident and injury free environment. • LOGSTOR ensures participation of employees, and their representatives in all H&S initiatives and actions regarding improvements.
ENVIRONMENT	<ul style="list-style-type: none"> • LOGSTOR is committed to prevent any environmental pollution from the processes and business activities, by continuous monitoring and reduction of raw materials consumption, waste generation, media consumption, as well as elimination of hazardous chemicals. • LOGSTOR analyses life cycle impacts from our products and processes. This work is integrated in product and process development so that the environmental impact can be minimised through design and production as well as use and disposal of goods.
QUALITY	<ul style="list-style-type: none"> • LOGSTOR meets the requirements and expectations of our customers, as well as other stakeholders, with a "Be Right the First Time" culture. This is our goal, which we implement through: <ul style="list-style-type: none"> - a proven system of evaluation and selection of suppliers and subcontractors, and development of partnership cooperation with them, - continuous improvement of the quality of offered products through use of modern technological solutions, minimization of quality complaints and constant monitoring and improvement of processes, - raising professional qualifications of employees through the training system and improving the internal organizational structure.

- Every employee of LOGSTOR organization complies with the requirements of the HSEQ Management System and all applicable codes and standards. Every employee is expected to be pro-active in all aspects of work and to comply with the rules based on our zero-tolerance approach.
- LOGSTOR constantly monitors its performance through ambitious objectives and KPI's, as well as interested parties needs and expectations, and implements improvements when appropriate. Effectiveness of HSEQ management system is measured in regular management reviews.
- LOGSTOR Management Team promotes continuous improvement and innovation culture. Management Team encourages every employee to bring up new ideas and suggestions that can enhance our business.
