

LOGSTOR presents Rafał Klonek - Foreman, Production

Please tell us a few words on how long have you worked for LOGSTOR and describe your position

I have been working at LOGSTOR since 2010.

I have started work on assembling elbows area and currently I am a foreman. I work on the implementation of production goals, improving quality and safety.

What do you value most at LOGSTOR?

I value the most people and working with them. We build LOGSTOR together. Contrary to common opinions one can always learn something from working with people, for example: There is not only black or white but there is grey colour also. You have to be open to people.

What have you learned here?

I have learned many things. Most importantly — teamwork, that everyone has a smaller goal that leads to the achievement of a larger one.

What is LOGSTOR doing to make you successful at work?

Trainings, for sure. Support and motivation from my superiors. From the beginning of my work I have had many trainings, necessary to perform my work as well as those that improve my skills.

LOGSTOR offers a great opportunities for personal development if you have the potential and not afraid to get involved.

What is the most meaningful part of your work?

Possibility of self-realization. Being able to get satisfaction from the fact that something will be done well, on time, etc.

I like to feel that I carry out the tasks and goals entrusted to me. Even if something goes wrong, I can analyse it to avoid similar mistakes in the future.

When do you have most fun at work?

I feel fun when everything goes according to plan, I see that people are not afraid to get involved and enjoy work.

Fun at work - sometimes there is a lot of fun during meetings with my team, not always does everyone understand everything well, and sometimes asks a question that makes us laugh. But we all are just humans.
