

LOGSTOR Academy presents
Instructor Morten U. Chemnitz:

Morten Thrives on Variation and Travelling

Morten has been working at LOGSTOR for quite some years and has earlier been in our Service Department and travelled around the world as a fitter. This experience makes Morten a great asset to LOGSTOR Academy. Morten joined the team in March this year and is already an autonomous instructor.

What is your Typical Workday like?

The days at the Academy vary a lot. Not many days are alike. Just recently, I acted as a guide for some Englishmen in a factory tour, including demos of our casing joints, and soon I'll be off to train fitters on location in Denmark.

What do you Like about your Work as an Instructor?

That you meet a wide variety of people. To convey good and useful knowledge which is usable in the field. That we issue a certificate, which is considered a quality label – surely that's awesome! It is of great value to the customers to receive qualifying training.

What Qualities are Essential for your Work?

That I can show our course participants how we want to make sure that our products are installed correctly. So the customers get value for their money.

What Makes a Good Day?

To succeed and have a good sparring with the course participants.

Why is LOGSTOR Academy a Good Workplace?

There is a very good distribution between planning and holding courses as well as freedom with responsibility and a good tone among colleagues.
