

Intelligent pre-insulated pipe systems for industrial applications

Customized solutions for industrial applications is our strong point of difference, which has secured us a top position in the competitive landscape.

The unique attribute is that our pipe systems are designed to be maintenance free, easy to clean and with a long service life expectancy. Together with the excellent insulation properties and reduced energy consumption, it ensures low operating costs. All with high value for our customers.

Industry Calculator

To calculate the most energy efficient solutions, we invite you to use our Industry Calculator, which is a web-based calculator tool for industrial applications with the possibility of calculating heat loss and dew point temperature.

Furthermore, it is possible to calculate savings by pre insulation vs. traditional and no insulation. The tool covers PUR, PIR and HT3 insulation and various carrier- and casing pipe materials.

With the Industry Calculator, we offer our present and future customers a unique tool for evaluating and choosing the best possible pipe systems for their solutions. Calculations ensure and document the best way to establish energy efficient and eco-friendly infrastructures.

SOLUTIONS

- Environmental assurance
- Steam and condensation
- Cooling
- Leak detection
- Heat tracing
- Service and process
- Special solutions

INDUSTRIES

- Food Industry, incl. dairies and the beverage industry
- Oil and Chemical Industry
- Pharmaceutical Industry
- Wastewater
- Other industries

Industry joints and LOGSTOR Academy

Joints for industrial applications are a vital part of your pre-insulated pipe system, hence it is never a good idea to compromise on quality.

We offer a comprehensive range of standard joints, which consists of straight joints and bend joints, T-joints, end caps and other accessories.

Our joints are designed to reduce the number of pre-insulated components and ensure fast, correct assembly at the lowest possible cost.

- Indisputable quality
- Fast installation
- Flexible and bendable
- 100% watertight
- Trackable via GPS
- Same mechanical strength as the rest of the system

Let us do the work for you or do it yourself - the choice is yours!

We have experienced installers that can assembly the system for you. However, if you wish to do it yourself, we can offer our customers or the customer's fitters or supervisors appropriate education. Our LOGSTOR Academy concept is rightfully perceived as the best in the business, so do not hesitate to contact us.

In the meantime, check out our installation movies on the LOGSTOR YouTube channel and experience firsthand the simplicity of joint installation!
